

Alke Monochrome

| design by Alain Berteau

Finally: a bathroom cabinet full of surprises!

New technologies, new materials and a design that wouldn't look out of place outside the bathroom. ALKE's new Monochrome range doesn't just keep within the lines with its colours, it actually redefines them.

“No walls, but open spaces – that's how we'll be living tomorrow. In homes with a bathroom that opens out into the bedroom or dressing room, that bathroom has to be stylishly designed. Not with the umpteenth vanity-and-cabinet combination, but with a piece of furniture that has real character. We wanted to get away from the old design stereotype. It had to be something that would look just as good in your living room”, says designer Alain Berteau
