PLAY-IT-COLLECTION

A TIMELESS DESIGN AT AN AFFORDABLE PRICE?

WITH OUR PLAY-IT COLLECTION YOU ARE DEFINITELY IN THE RIGHT PLACE!

The various types of cabinets, each with accompanying ceramic, mineral marble, crystal glass or solid surface wash basins provide you with a multitude of possible combinations.

Using the broad colour pallet – from solid colours to various kinds of wood textures –, a furniture combination to suit all tastes can be created, ranging from units with timeless pure lines to furniture with a warmer and richer appearance.

No bathroom is complete without a suitable mirror panel or matching mirror cabinet with double sided mirrored doors, combined with a chrome LED lighting fixture or our sophisticated and performant LED canopy.

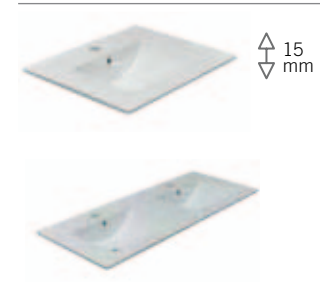

Our additional accessories such as half-height or tall sectional cabinets for additional storage, the splendid wooden drawer divider, chrome towel holder and the clever combibox with socket and USB charger make sure you will enjoy your relaxing bathroom.

Discover our Play-it collection and make your own unique combination to create the bathroom of your dreams!

Type 3				
	110	INDINZ	INDINZ	26
Type 4				
	324		INDS4	78
	424	INDQ4		78

You can add different drawer dividers up to a maximum width of:

front width - 124 mm.

For example: cabinet width 1000 mm
→ useful inner drawer space/inner drawer = 1000 - 124 = 876 mm.

You can upgrade this drawer with:

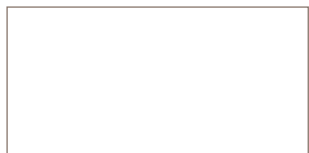

- up to 7 drawer dividers type 2 (width 110 mm) <drawers without siphon cutout> or
- 1 drawer divider type 4 (width 136 mm) + 6 drawer dividers type 2 (width 110 mm) <drawers without siphon cutout> or
- 1 drawer divider type 1 (width 400 mm - drawer with siphon cutout) + left 1 drawer divider type 4 (width 136 mm) + right 2 drawer dividers type 2 (width 110 mm).

Drawer divider colour: walnut wood

MATERIALS

WASH BASIN

MINERAL MARBLE

Mineral marble is a seamlessly finished conglomerate of high-quality minerals, dolomite and polyester resins. The glossy white gelcoat surface finish protects the basin from sunlight and wear. This type of wash basin is very hygienic and easy to clean with water and soap. Small scratches or scrapes can be removed.

For more product information and maintenance tips, please visit: www.alke.be.

TOP SOLID

Top solid is produced in the same way as mineral marble. In this case, however, the surface finish consists of a matt white gelcoat. This type of wash basin therefore has comparable product properties as those of mineral marble.

PORCELAIN

Porcelain is a seamlessly finished and 100% natural product made from ceramic clay fired with a glaze coating. The glossy white finish protects the wash basin from intensive use. Porcelain wash basin tops have a long life, are colourfast, heat- and scratch-resistant and very low maintenance. Due to the nature of the production process, ceramic wash basins are subject to small dimensional tolerances. The use of abrasives is not recommended.

For more product information and maintenance tips, please visit: www.alke.be.

CRYSTAL GLASS

Crystal glass is an environmentally friendly tempered glass with a higher hardness than standard glass; it is also called super white glass. Typically, it is characterised by exceptional brightness and dimensional stability, which gives it a very modern appearance. Crystal glass has a high resistance to acids, alkalis and stains. Other than that, this sleek product has the same characteristics as ordinary glass and is very suitable for intensive daily use.

For more product information and maintenance tips, please visit: www.alke.be.

SOLID SURFACE

Solid surface is the collective name for solid surface materials. It combines the great properties of natural minerals and plastic resins and is also very sturdy, impact- and scratch-resistant. On top of that, it is environmentally friendly. Since this a solid material, damage to solid surface wash basin tops can be repaired in most cases. Other properties: extremely hygienic, anti-static, feels warm, has a sophisticated feel, is very easy to clean, resistant to most household chemicals, has high impact resistance and can withstand very rough treatment. Accidents such as scratches, fire, nail polish, ... stains can usually be removed with VIM scouring powder, a Scotch-Brite pad or possibly with sandpaper.

For more product information and maintenance tips, please visit: www.alke.be.

BASE UNIT AND SECTIONAL CABINET

MELAMINE

The front and carcass material is made from the compression of layers of paper impregnated with melamine resin on an MDF or particle board base layer. A process involving pressure and heat causes the irreversible curing of the impregnated layers and the bonding with the base panel material.

The pressing results in a scratch-, impact- and abrasion-resistant surface that is optically almost seamless.
