

## GREEN LOGIX - FARMFRITES

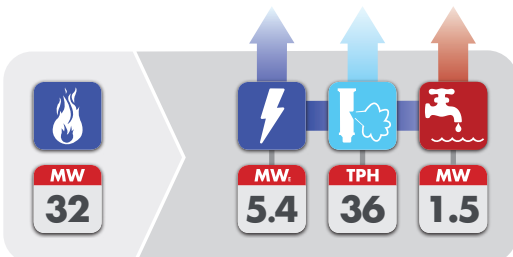

LOMMELE, BELGIUM

### GREEN LOGIX - FARMFRITES

Commissioning	Augustus 2017
Fuel	natural gas
Gas Turbine Efficiency	29.7 %
Boiler Efficiency	92.4 %

### GASFIRED COGENERATION PLANT

Green Logix Co-Generation (GLCG), located in Lommel (Limburg, Belgium), is a new company established for the investment in renewable energy projects. GLCG has ordered a turnkey-CHP plant including boiler house and high-voltage connection.

The CHP will be erected on grounds and for service of Farmfrites, a large potato processing plant, which will consume most of the generated power and all of its steam.

Farmfrites, a family owned company, is the second largest potato refining business with 6 production sites, 40 sales offices, consumers in 80 countries and processing 1,3 Mio ton of potato a year.
