

P.T.B.-GEDROOGD KWARTSZAND

White, dried sand

Characteristics

The main properties of P.T.B.-GEDROOGD KWARTSZAND are:

- very high degree of purity
- uniform
- does not stain
- hard
- easy to process, e.g. works itself easily into the cracks
- absorbs little water
- does not contaminate
- does not contain any organic components or clay
- ecological

Applications

White sand consisting for 99,5 % of silica sand.

JOINTING SAND

For sweeping sand into the gaps of a pavement, drives, terraces, floors, etc. The sand smoothly fills all the cracks, and absorbs little water as a consequence of which it dries quickly after moistening.

JOINT MORTAR

This sands provides an agreeable and easily processable mortar for joints up to 10 mm, is very hard, increases the water resistance, does not stain and diminishes the chance of efflorescence.

ABRASIVE POWDER

P.T.B.-GEDROOGD KWARTSZAND is very hard and can be gritted under the grinding stones as supplementary abrasive agent. This type of sand can also be used for wet sandblasting e.g. for renovation of walls, removing old paint, moss and algae, ...

DECORATED SAND

E.g. in aquariums and terrariums, etc.

TECHNICAL DATA	Values
Specific density	2,65
Bulkweight	1,5
Hardness	7 (scale of Mohs)
Content of SiO ₂	99,50%
Content of Fe ₂ O ₃	0,03%

As the applications of our products are diverse, no single application guideline can be laid down. All product data reflect the state of knowledge of our products at the time of publication. Therefore all suggestions and recommendations concerning the use of our products are merely illustrative. Apply the product on a small and insignificant spot before starting to use our products to be sure the desired result is obtained. Always ask for the technical sheet of our products. Visit the website www.compaktuna.be. Consult our "technical department" which can be reached for free on the green number 0800/92279. The Dutch text shall be exclusively binding.
