

# VERSTERKINGSVLIES

## P.T.B.-MEMBRAAN WATERDICHT

Nonwoven polypropylene reinforcement in edges and corners

### Application

Versterkingsvlies P.T.B.-MEMBRAAN WATERDICHT can be used as a reinforcement cloth for P.T.B.-MEMBRAAN WATERDICHT. The application of a reinforcement cloth allows to achieve thicker layers in the system. Can be applied to reinforce corners.

The reinforcement cloth is made of thermally welded polypropylene fibers and can resist the action of chemicals. The cloth is flexible and can easily be applied on edges and in corners.

### Directions for use

On critical places as e.g. in corners and around tubes, apply the reinforcement cloth in the first fresh layer of P.T.B. MEMBRAAN WATERDICHT. Impregnate immediately the reinforcement cloth with fresh P.T.B.-MEMBRAAN WATERDICHT. Then apply the second and third layer. The total thickness of the system should be at least 1 mm.

### Packaging

Available in boxes of 12 rolls (length : 25 m/roll and width : 12 cm )

### TECHNICAL DATA

Quality	PP filament
Colour	White
Stabilization	Thermal
Specific weight (DIN 53854)	ca. 50 g/m <sup>2</sup>
Thickness	ca. 300 µm
Max. long. / trans. tensile force	ca. 115 N / 90 N
Elongation	ca. 95%

As the applications of our products are diverse, no single application guideline can be laid down. All product data reflect the state of knowledge of our products at the time of publication. Therefore all suggestions and recommendations concerning the use of our products are merely illustrative. Apply the product on a small and insignificant spot before starting to use our products to be sure the desired result is obtained. Always ask for the technical sheet of our products. Visit the website [www.compaktuna.be](http://www.compaktuna.be). Consult our "technical department" which can be reached for free on the green number 0800/92279.
