Vendor Portal

About

Are you sick of filling in the deliveries from suppliers manually and being prone to errors?

The Vendor Portal Solution of C&W is the answer. It's the perfect system to receive the information of your non-informatized supplier and to advance towards a more automated reception process (on the base of the delivered ASN = Advanced Shipping Notification information). The Vendor Portal is meant for optimization and automation of the inbound process. Suppliers can register their freights at departure and labels can be printed conform your needs.

Functionalities

- Producing pallet labels (GS1 conform or own format).
- Compiling a shipment & linking of pallets.
- Printing of pallet labels.
- Printing of shipping bill if desired.
- Forward shipment information through our SCO EDI Portal to the host and/or other parties.

Number Of Pallets: 1
Sccc Code: Sccc

Orders

Forward shipment info through our SCO EDI Portal to the host and/or other parties

Intended for

- Web-EDI pallet labels + DESADV forwarding through EDI to your customer.
- For your suppliers who do print GS1 labels but can't execute EDI. They can upload them manually or through Excel / CSV / XML.
- For your suppliers who don't print GS1 labels and register, print and send info on your purchase orders (through our SCO EDI platform).
- Can be set-up as outbound-flow. In that case, instead of uploading purchase orders, shipping bills should be uploaded in the portal to forward pallet labels & possibly EDI info.

Vendor Portal Conclusion

- Budget friendly
- Quick implementation for new suppliers/customers
- Scalable solution
- Uniformization of pallet labels
- Modern, accessible technology
