

THE CLEAREST POSSIBLE VIEW

An ever-broader range of advanced
ATC solutions, based on years of
experience and expertise

NOW IN
4K

A woman with brown hair tied back, wearing a white lab coat and a blue lanyard, is focused on a task in a laboratory. She is holding a red, multi-ported component connected to a white cable. The background is filled with various pieces of laboratory equipment, including a microscope, a pipette, and a rack of test tubes. The scene is brightly lit, suggesting a professional and technical environment.

We design our solutions in close partnership with customers. By talking to ATC operators and air traffic service providers, we gain deeper insight into operators' working habits, challenges and wishes.

PRODUCT LINEUP

MDP-843

- 43" wide screen for ATC application
- 4K screen
- ATC grade design
- Available with or without front glass
- Support color calibration

MDP-471

- 28" diagonal size
- 2K x 2K square screen
- High bright
- Best in class radar screen
- Multi touch PCAP screen (MDP-471/TS)
- NetViz mode available

ADP-361

- 24" diagonal size
- 1920 x 1200 screen resolution for use in Landscape or Portrait
- Support screen for controller working position
- Support color calibration
- ATC grade design

TCD-361

- 24" diagonal size
- 1920 x 1200 screen resolution
- High Bright screen for Airport Control Tower usage
- Support color calibration
- ATC grade design
- Multi Touch PCAP Touch screen optional
- Enhanced optical stack for optimum reading under all circumstances

RNA-310

- Real time network adaptor
- Desktop or rackmount packaging
- Enables remote and compact
- Working position
- Real-time matrix switching, video extension, and KVMA (keyboard, mouse, video and audio switching) over standard 10G networks

NEC PARTNERSHIP

Esterline partners with NEC display solutions and allows offering for less frequently used screen sizes in the Air Traffic Control applications.

a unique solution for At The Glass recording and real-time streaming.
To help you get more value out of ATC!

PA272W

- 27" support screen suited for ATC
- For use in landscape or portrait position
- 2560x1440 screen resolution
- Provides +300 cd/m2 with a contrast of 1000:1
- Supports color calibration
- Available in: 17", 19", 21", 24", 27", 30"
- Certified by Esterline

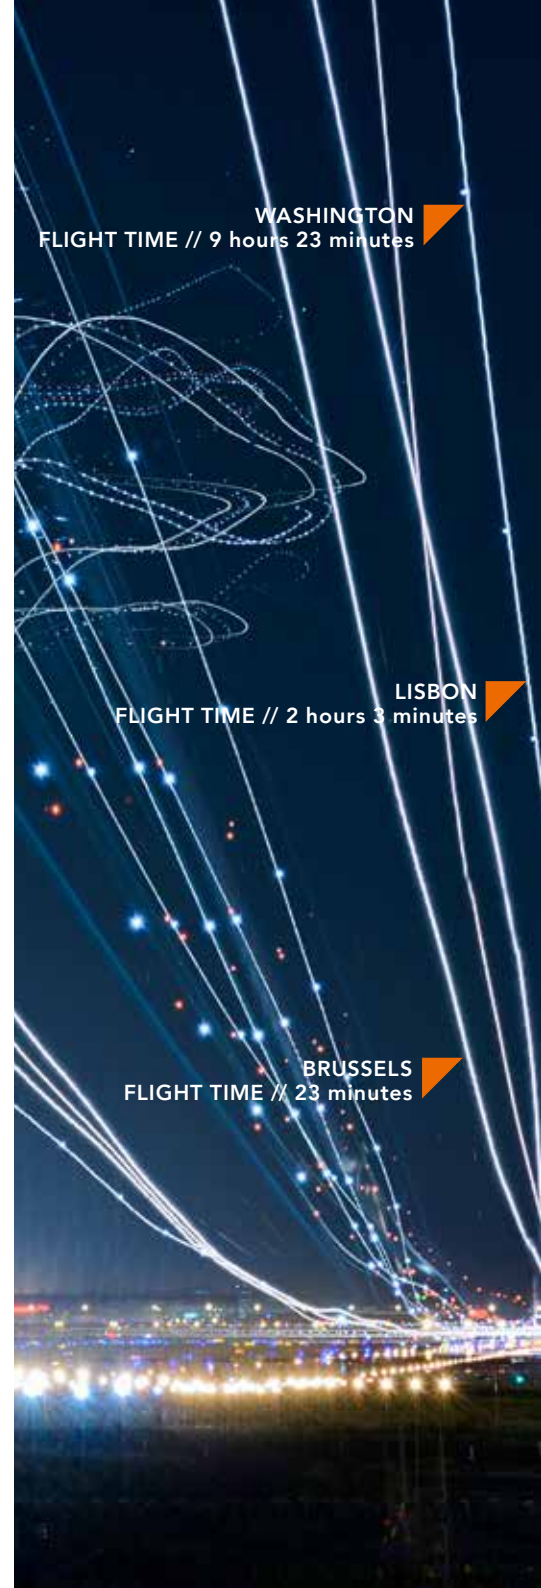

70% of the world's ATC displays are Esterline displays

Esterline designs, develops and manufactures custom-engineered solutions for the aerospace and defense markets. Our sensors, control systems, avionics solutions and advanced materials help leading customers around the world to raise productivity and precision and, consequently, improve their overall performance.

In the field of aerospace, we are a trusted supplier to the world's biggest airports: 70% of the ATC displays in use around the world today, are Esterline displays. And we keep expanding our portfolio with new models – like our wide-screen UHD display – and groundbreaking new technology.

That's how we help ensure that every, truly every, ATC controller has the clearest possible view, to make the most of limited airspace while keeping passengers safe.
