

Technical data sheet

PROTECTION MADE EASY

Antislip Bead

Description and destination of the product

Antisilip Bead is an inert polypropylene bead that is added to floor paints in a dosage of 4 to 5 %. This in order to obtain good antislip properties of the floor system. The bead has an average particle size of ± 350 micron.

Colour

Colourless.

Use

The bead is turned into the paint while stirring. It is important to add the bead to the first finishing coat and to finish this coat with a finish coat without bead. This to avoid running out of the bead.

Safety measure

For detailed information about safety measures, personal protection and transport data of this product, we refer to the safety data sheet.

The last update of our technical data sheets is always available at our website: www.libertpaints.be

Disclaimer

The information given in this technical data sheet is only a general product description, based on our experiences and tests and therefore does not represent a specific practical case. Consequently Libert Paints doesn't guarantee the functionality or result and takes no responsibility in this respect.

We advise our clients to test the applicability of the product to the nature and the state of the surfaces and to carry out the necessary representative tests in case of doubt. Please contact our R&D department as the occasion arises.

Attention: our clients should verify whether the present technical data sheet hasn't been replaced by a more recent version.
